

VENTILATION UPGRADE KIT

Will enhance your Chick Master setters to the latest technology in humidity and heating and includes components to remove copper ducts for optimal setter hygiene, airflow and performance.

"Forget Copper Ducts!"

NEW RING HEATING ELEMENT MOUNTED ON THE FAN

- Decreases your operating and labor costs by eliminating the need to maintain, clean or replace ducts.
- Removes bulky ducts improving airflow for better performance and improved hatchability.
- Upgrades your humidity system to the Cyclomist™ Airless Humidity System, introduces a fine mist directly into the airflow without the need for a compressor providing lower maintenance and operating costs.
- Updates the heating system with new fan-mounted heating elements providing better distribution of heat.
- The relocation of the heating and humidity devices directly into the airstream provides immediate response to environmental needs
- Enhances bio-security
- New plastic Vostermans fan board option available
