

# CHICK MASTER PREVENTATIVE MAINTENANCE PROGRAM (PMP)

**Preventative maintenance is an important and often overlooked aspect of hatchery maintenance that will prolong the life expectancy of your equipment and ensure they are kept running at maximum capacity and peak performance for longer.**

Chick Master can provide a technician to assist or lead the work. This allows your staff to focus on reactive or operational tasks within the hatchery, with the peace of mind the machines are taken care of. If during the visit any other maintenance issues are identified this will be highlighted to your staff, or corrected if time allows.

## **BENEFITS:**

- Reduce unscheduled downtime due to worn parts
- Semi-dedicated team of technicians who know your site, staff and equipment
- Extend the life cycle of your incubators while maintaining within operational schedules
- Spread the cost with quarterly payments and part deliveries
- Consistent pricing over a 5-year plan to help manage your budget year-on-year
- Spread maintenance tasks over a 12-month period to avoid accumulation of work
- Regular visits by a Chick Master technician for a fresh pair of eyes

## **FEATURES:**

- Genuine Chick Master parts
- Experienced Chick Master staff carrying out work to a high quality
- Free parts cabinet with Chick Master “easy order” QR codes
