

Gen II/Gen III Plus

Control Upgrade and Enhancement for Genesis II and Genesis III Setters and Hatchers

The PLC (Programmable Logic Controller) and its associated components are now obsolete for all Genesis II and Genesis III controls. In response, Chick Master has developed an upgrade to replace the original PLC with the latest components to bring your control system up-to-date.

- Existing PLC is replaced with the latest specification PLC
- New communication module
- New low voltage modulating damper to optimize accurate control
- Replacement temperature and humidity sensors
- Replaced components can be used as spares for other machines
- Available with a new color touch screen
