

Hatchery Management System

Keep your chicks in tune with an information management system that goes beyond setters and hatchers

Optimal production from your hatchery equipment can be fully realized when your independent components are orchestrated through intelligent management systems.

Maestro facilitates a coordinated operation of incubation and ventilation equipment, so you can closely control and monitor the entire process for higher profits.

- The hatchery layout-drawing feature allows view of the entire hatchery at a glance for easy monitoring
- Manage the incubation process through clear and easy-to-interpret graphics
- Manage the ventilation systems connected to Maestro for optimal room conditions of the hatchery
- Alarm center feature to log information regarding which alarms remain active, including storing the ID number of the personnel who resolved the situation
- Monitor the hatchery's electrical consumption in real time
- Compare two independent systems in a single graph to increase your level of control in the hatchery
- Hatchery Management calendar tool to schedule set times, transfer times, hatch days and maintenance tasks
- Remote access via the Internet by use of your laptop, desktop or tablet computer
- Learning how to use Maestro is simple, intuitive and requires minimum training
