

Short Pitman Bar

Long Pitman Bar 611D-02-4630

Short Pitman Bar 611D-01-4630

The Long and Short of Improving your Classic Turning

The Classic turning system uses a Pitman Bar as the actuator to initiate the 90 degree turns. The Classic setters are compatible with two specially manufactured versions of this bar. The standard “short” bar that Chick Master has been using for more than 15 years and the one used in older models that is longer in length.

Though upgrading to the short bar does take time and effort to install, it is just as simple to manage and maintain as the older version. In the design, Chick Master considered the long-term savings and safety benefits the newer short Pitman Bar has on the setter. It is longer-lasting due to its reduced size and reduced stress from the turning system. This offers a turning system that should require less maintenance and has less possibility of down time.

For a limited time, we are presenting Classic users with the opportunity to update their current setters with the short-version Pitman Bar Conversion Kit for only \$125.

That’s the same price as one long bar with all the benefits of using the current model!

Place your order today!

Part Number	Description
