

Power Master

Power your Classic Turning System with a Power Master motor

For over 20 years, all new Chick Master Classic setters have come equipped with the Power Master Motor. This efficient and durable motor keeps the turning system active for 24 hours per day.

Prior to introducing the Power Master Motor, we used another gear motor to supply the necessary power to its turning systems. Those parts became hard to get from our suppliers and resulted in extended delays in delivery. The challenge was to find an alternate upgrade kit that was economically attractive for our more vintage setters.

To maintain our commitment to excellence in customer service, we are pleased to offer the Power Master at a specially reduced price. This motor is interchangeable with the Von Weise motors that were used on Classic setters up until the mid-1990's. Using a standard motor means it is an item we keep in stock, so no more waiting for the parts you need for the obsolete VW motors!

Now is the time to enhance your Classic setters with the Power Master Motor and take advantage of the new reduced price for this upgrade.
